Custom Software Development | Computer Vision & AI | IoT Systems | Integration & Automation

COMPANY OVERVIEW

Scotch Software LLC is a small business based in Everett, WA, providing custom software development, computer vision, AI, and IoT solutions for public and private sector clients. The company specializes in AI powered solutions to improve operational efficiency and reduce manual processes.

CORE CAPABILITIES

Custom Software Development

Custom software development and custom application development for operational, industrial, and business environments. Experience delivering cloud application development, mobile application development, and full stack development solutions supporting internal operations, data management, and workflow modernization.

Computer Vision & AI

Development of computer vision systems, machine vision applications, and AI-powered inspection solutions for industrial and operational environments. Experience integrating image analysis, automated classification, sensor integration, and real-time operational decision support.

IoT Systems

Support for industrial automation initiatives including IoT integration, edge computing systems, sensor integration, embedded device communication, and hardware/software coordination for connected operational systems.

Integration & Automation

Design and implementation of automation software, systems integration, and data pipeline development solutions that reduce manual processing, improve operational visibility, and streamline organizational workflows across distributed systems.

PAST PERFORMANCE

CropDetect

Designed and developed an automated agricultural sorting system utilizing computer vision systems, AI-powered inspection, sensor integration, industrial automation, and edge computing technologies to support operational workflow.
